This is a Schedule to a Mortgage between:
(hereinafter referred to as "you")
And The Fire Department Employees Credit Union Limited (hereinafter referred to as "Fire Services CU " or the "Mortgagee")

## NAME CHANGE

All references to Toronto Fire Department Employees Credit Union Limited in Standard Charge Terms No $\qquad$ are hereby deleted and replaced with the words "The Fire Department Employees Credit Union Limited".

## INTEREST

The interest rate payable by you as of the date of the mortgage is $\qquad$ \% per annum calculated monthly not in advance.

The equivalent rate of interest calculated half-yearly not in advance to the current mortgage rate as of the date of the mortgage is $\qquad$ \% per annum

The interest rate chargeable on the principal sum and all other amount payable under the Mortgage is a variable rate per annum equal to the Fire Services CU Prime Rate plus/minus $\qquad$ \% as published in its Branches from time to time, calculated monthly, not in advance, before and after default, maturity and judgment. The resulting rate is known as the 5 year closed Variable Rate Mortgage Rate.

The interest rate will vary automatically, without notice to you, each time that there is a change in Fire Services CU's Prime Rate.

## DEFERRED INTEREST

"Deferred interest " is that interest accumulated on the loan amount from one regular payment to the next that exceeds the regular loan payment. Deferred interest is due and payable on demand.

## DESIGNATED AMOUNT

Designated amount shall mean the lesser of:
(a) the original principal amount; and
(b) $80 \%$ or a lesser percentage as established by us in our discretion of the fair market value of your property, or in the case of a CMHC or GENWORTH insured mortgage, the lesser of:
(i) $95 \%$ [for CMHC or GENWORTHI] of the lesser of the appraised value or purchase price of your property, plus the CMHC or GENWORTH insurance premium, and
(ii) $105 \%$ of the original balance of the mortgage including the CMHC or GENWORTH insurance premium.

If at any time during the term of the mortgage the outstanding loan balance exceeds the designated amount you shall be required to take one of the following actions:
(a) increase the amount of each regular payment under the mortgage in order to amortize the mortgage over the remaining amortization period;
(b) reduce the total of the loan amount by making a lump sum payment bringing the total loan to a point below the designated amount; and
(c) convert the mortgage to a fixed rate mortgage having equal monthly payments.

If you are unable to do any of the above, the mortgage will immediately, at our option, become due and payable.

## CONVERTIBILITY

When not in default you may convert the mortgage to a fixed rate mortgage having a term of three years or greater by communicating with the Mortgagee and selecting from the mortgage options and terms available at that time. You must sign our amending agreement. All amended terms, conditions and provisions of the mortgage will be contained in the amending agreement. You agree to pay us any processing or administration fees, together with accumulated interest, as well as all legal expenses with respect to the conversion documentation. Once the mortgage has been converted, the prepayment privileges of the new mortgage, if any, will apply in place of those applicable to this mortgage.

## MORTGAGE PAYMENTS

The amount of each mortgage payment payable by you is fixed under the terms of the mortgage; however, the amount of the interest and principal components of each payment may vary as the current mortgage rate varies. Regular mortgage payments will be applied firstly to any collection expense, then escrow accounts, then previously accumulated and unpaid deferred interest, then the total amount of interest which accrued on the principal during the period and finally to reduce the principal amount.

SCHEDULE OF ADDITIONAL PROVISIONS
Applicable to 5 Year Closed Variable Rate Mortgage
The following formula using the current rate may be used to determine the amount of interest accrued on the principal sum in the payment period.

| Principal amount owing after last <br> payment | $x$ | Current mortgage <br> Rate | $x$ | Number of days during payment period on which <br> current mortgage rate was chargeable |
| :---: | :--- | :---: | :---: | :---: |
|  | Number of days in the year |  |  |  |

Assuming the following:
(a) Principal amount owing after last payment
\$92,550
(b) Current Mortgage Rate
(c) Monthly Installment 9\% \$ 827.97 30 days

The formula set our above can be used to determine the interest which accrued on the principal sum during the period.

| $\$ 92,550$ | $\times$ | $9 \%$ | 30 | 365 |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |

The monthly installment (\$827.97) is applied firstly to payment of accrued interest (\$684.62) leaving a balance of $\$ 143.35$ to reduce the principal.

## Equivalent Interest Rates

The following information is provided to you since the current interest rate may be expected to change from time to time. For each current mortgage rate (calculated monthly not in advance) set forth, the adjacent column sets forth the equivalent interest rate calculated semi-annually not in advance.

| CURRENT MORTGAGE RATE CALCULATED MONTHLY NOT IN ADVANCE (\%) | EQUIVALENT INTEREST RATE CALCULATED HALFYEARLY NOT IN ADVANCE (\%) | CURRENT MORTGAGE RATE CALCULATED MONTHLY NOT IN ADVANCE (\%) | EQUIVALENT interest rate CALCULATED HALFYEARLY NOT IN ADVANCE (\%) | CURRENT MORTGAGE RATE CALCULATED MONTHLY NOT IN ADVANCE (\%) | EQUIVALENT INTEREST RATE CALCULATED HALF YEARLY NOT IN ADVANCE (\%) |
| :---: | :---: | :---: | :---: | :---: | :---: |
