

Focus on Teraview 2017

Teraview on the Web

The accessible, bilingual, Web-based version of Teraview is nearly ready for roll-out. The pilot begins in October, with release to end users scheduled to start in January 2018. Visit teraview.ca for more info.

Did you know?

Teranet has over 177 million unindexed images inventoried from microfilm, enabling more timely fulfillment of many exception requests.

Quick Teraview Facts

Teraview is proud to offer unmatched security, reliability, and 90+ million registered documents and plans.

There has never been a successful security breach of the Teraview system in its entire 20+ year existence.

Teraview's uptime measure since August 2016 is 99.9% - meaning the system was down for only 42 minutes in the last 12 months.

Teraview has over 90 million paper document and plan images available, including 1,500 board plans dating back to the 1850s.

You spoke, we listened!

“I would have a better experience if Teranet could be integrated more smoothly with Windows 10.”

✔ **Windows 10 integration is here!**
Support for Windows 10 was introduced earlier this year with Teraview 9.

“There should be some form of training program.” AND “I don't think we are aware of the extent of the features and tools that are available in Teraview, which would be helpful to us.”

✔ **New Teraview training is on the way!**
Several new training modules are on the way for Teraview on the Web.

“I would like to be able to increase the font size in documents (especially statement section) that I am preparing. It can be very hard to read them.”

✔ **Teraview on the Web will provide an improved user experience!**
Teraview on the Web will deliver improved accessibility for ALL users.
