## Issue with modifying a party name on a Discharge

June 19, 2023

It has come to my attention that there is a small issue with statement 3700 used in a Discharge. The issue occurs when Teraview users are modifying the party name without a sourced assignment instrument and evidencing the Change of Name in statement 1606 or statement 61. Teraview users will be presented with the following error message:

A screenshot of a web application interface. At the top, there are tabs for 'Instrument Creation' and 'Search'. Below the tabs, the breadcrumb path is 'Instrument List &gt; DISCH OF CHARGE 5'. To the right of the breadcrumb is a 'Save' button and a dropdown menu. Below the breadcrumb, it says 'Work in Progress - Discharge Of Charge'. A red-bordered box highlights an error message: 'Signing Validation Errors Found: 1'. Below this is a table with two columns: 'SECTION' and 'DESCRIPTION'. The table contains one row with the section 'DISCHARGING PARTY' and the description 'Statement 3700 cannot be selected for Party From &lt;INSERT NAME&gt; as there is only one source Instrument.' There is a 'Remove' link at the end of the row. A red 'X' icon is in the top left corner of the error box, and a small 'X' icon is in the top right corner.

The issue will be fixed shortly, but, in the meantime, if you receive the message below when you are selecting statement 3700 without a sourced Assignment, please contact [@Bowman, Crissy \(MPBSD\)](#) & [@Menard-Landriault, Julie \(MPBSD\)](#) for support.
